

BUG_SD_PU_01

Title: Inventory page displays invalid/broken images

Description: When logging in as problem_user, many of the product thumbnails on the inventory page fail to load and show broken/placeholder icons.

Steps to Reproduce:

1. Go to <https://www.saucedemo.com/>
2. Log in with username problem_user / password secret_sauce
3. Observe the images for each product on the inventory grid

Expected Result:

- Every product tile displays its correct image.

Actual Result:

- Several product tiles show broken-image icons or placeholders instead of the real product image.

BUG_SD_PU_02

Title: Sorting functionality does not work

Description: Sorting the inventory has no effect when logged in as problem_user.
Selecting any sort option leaves the item order unchanged.

Steps to Reproduce:

1. Log in as problem_user / secret_sauce
2. On the inventory page, open the “Sort” dropdown
3. Select any sort option (e.g. “Name (A to Z)”, “Price (low to high)”)

Expected Result:

- Products reorder according to the chosen sort criterion.

Actual Result:

- Inventory remains in its original order; no resorting occurs.

BUG_SD_PU_03

Title: Inventory grid layout misaligned

Description: The inventory items render misaligned and overlapping when using problem_user, making some products partly hidden or unevenly spaced.

Steps to Reproduce:

1. Log in as problem_user / secret_sauce
2. View the default inventory grid (without applying any sort)

Expected Result:

- All product cards align in a neat, even grid with consistent spacing.

Actual Result:

- Some cards overlap or leave irregular gaps, breaking the grid layout.
